Dear Mike:

As we did last year, Bowen High School/BEST students will be happy to assist with the annual Wolf Lake wetlands festival, wetlands restoration and improvement project for the Calumet Container site. Our students can help with the festival by assisting with attractions, such as canoeing. They will work towards wetlands restoration by clearing brush and planting. These projects provide a marvelous Service Learning opportunity for our students in a unique natural setting that brings to life the Environmental Science textbook.

We value our partnership with you and the other high schools currently participating. We hope to continue the relationship.

Sincerely,

Joann Podkul
Lead Teacher
